# GUZZLE FOR GITHUB

## *A Beginners Guide To Guzzle With Github*

# Introduction:

### What Is An API?

> **API (*Application Programming Interface*)**
>
> **A way for applications to connect and share data programmatically.**

### What Is CRUD?

> **CRUD (*Create,Read,Update,Delete*)**
>
> **A methodology for organizing an application.**
>
> | Create Content | Read Data | Update User Content | Delete Data |
> |---|---|---|---|

### What Is Guzzle?

> **A FrameWork For Working With API's And HTTP Client Requests**

## The number of public API's is estimated to be at over 10,000

We live in a world where data is created in real time.

From Weather Data To Twitter Geo Location, The web is filled with API's that can be connected into new types of applications.

By using Guzzle we can develop rapid prototypes connecting APIs into applications.
